Foxit pdf reader mac download

I'm not robot!

I'm not robot!

At a GlanceThis free utility lets you view PDF files–and it takes up less space than Adobe Reader. Foxit Reader is a fast, free, lightweight alternative to Adobe Reader for opening and displaying PDF files. It's also feature-packed, though it lacks the print-to-PDF and conversion capabilities of fellow freebie Nitro PDF Reader. I've been using Foxit Reader since back in the day… The day when Adobe Reader had become a fat slob of a program that took forever to boot and load files. Adobe has improved greatly, but so has Foxit Reader. The latest version has a new look that mimics Microsoft Office 2007/2010 somewhat, and adds support for XML Form Architecture form filling, as well as Microsoft Active Directory Rights Management service. It also offers the ability to capture text, copy and paste it, though there's no wholesale export. I now use Nitro PDF Reader, because it offers print-to-PDF and creation abilities for free, but I'll be working Foxit back into the rotation simply because of its speed. It's perhaps twice as fast as Nitro at opening, and especially searching files, and time is money. Note: Foxit Reader 5 will install a toolbar and change your default search engine to Ask if you don't disable these options. –Jon L. Jacobi Visualize o Windows ou Linux num Mac Crie e edite facilmente videos impressionantes Uma ferramenta de gestão de projetos desenvolvida em Java Uma ferramenta de gerenciamento de projetos abrangente Gerencie vários times e projetos no seu Mac A forma mais fácil de criar códigos de barras em seu Mac Reading a lot of blogs can be tough to manage without an RSS news reader, which consolidates everything you read in one place. While there are plenty of news readers on the Mac, Reeder wins our hearts thanks to its beautiful and simple interface, thorough integration with social features, and fantastic customizability.ReederPlatform: OS X Price: $5 Download PageFeaturesSyncs with Google ReaderBeautiful interfaceSyncs (and fully integrates) with ReadabilityPost articles directly to Instapaper, Delicious, or your blogGesture supportCustomizable shortcutsSend to QUOTE.fm Read, Instapaper, Pocket (formerly ReadItLater), and ReadabilitySave to Pinboard, Delicious, Zootool, and EvernotePost on App.net, Twitter, Facebook (posting on Facebook requires OS X 10.8.2)Open articles with Instapaper Mobilizer and Google MobilizerYou can disable Flash (and other plug-ins) if you wantSupport for retina displaysWhere It Excels Reeder first entices you with its beautiful and simple interface but keeps you around with its solid list of features. Despite Reeder's simplicity, the app manages to pack in quite a bit. One of the biggest highlights is that Readability—the service that converts web pages into more readable pages of text—is a part of the app. If a news feed contains an article that needs a little touching up, you can click the Readability button and make it a lot cleaner. Reeder also provides tons of ways to share and save articles you find in your feeds. It integrates with several services, such as Instapaper and Pocket. You can also pin articles to Pinterist, save them to Evernote, share them on Twitter or Facebook, and much more. A very comprehensive preferences pane allows you to customize your entire experience, from shortcuts to gestures to the app's appearance. Reeder offers solid performance on its own, but you can make it run exactly the way you want with a few simple tweaks.Where It Falls Short Reeder offers few downsides, but it does lack subfolders. Rather than displaying any subfolders you may have in your Google Reader account, Reeder simply lists them without any hierarchy (i.e. it displays "News — Finance" instead of listing Finance below the News category). If you don't have a ton of feeds, this isn't a big deal. If you do, however, you'll find it a little annoying and wasteful. Reeder also costs money. While $5 is a pretty fair price for a really great news reader, its primary competition—NetNewsWire—costs nothing. While we like Reeder better, if you're frugal you're simply not going to choose it when an app that's nearly as good costs absolutely nothing.G/O Media may get a commissionThe CompetitionNetNewsWire (Free) was once our top pick, but over time it has come to feel a bit outdated. That said, it's still a remarkably powerful news reader with lots of great features. It's also free, so if you don't want to cough up $5 for Reeder you can get yourself a great alternative at no cost.Cream ($4) offers a more compact experience than Reeder's default view and costs a little less. Reeder, however, can shrink down to the same size. Cream is fairly new and still has a ways to go before it's truly a serious competitor, but it's definitely a news reader to watch.Pulp ($10) costs more than anything on this list and doesn't offer a ton of advantages. That said, if you'd like to read your news feeds in a traditional newspaper format you'll want to check it out. It offers a very different interface from all the other apps and seeks to show you news you'll actually like rather than just everything (by default).Gruml is another free RSS news reader much like NetNewsWire, but in my few months of use I found it wasn't quite as stable. On the positive side, it does have greater support for external services (like ReadItLater). It may have features that are important to you, and if so it may be worth trying, but despite being a pretty solid app it just doesn't measure up when you're actually using it.There are a lot of other news readers for Mac but these three offer the most notable, worthwhile differences. If you have a favorite that was pass over or overlooked, please mention it in the comments.Lifehacker's App Directory is a new and growing directory of recommendations for the best applications and tools in a number of given categories. This week, we're focusing on news reader applications.
